Mr. Hothi-

I wanted to follow up again to determine whether we would have any issues accessing the site the week of May 20th. We are beginning to make plans and would like to solidify our dates as soon as possible. Thank you for your assistance with this.

Hi Mr. Hothi-

I'm glad our conversation on Tuesday helped address some of your questions. Thank you for following up and confirming the site access issue.

As far as timing for our site assessment work, currently the best week for me and my team appears to be the week of May 20th. We would probably plan to arrive on site on Monday, May 20th and spend 3-5 days collecting the information we need to be able to

complete our investigation. To make the trip the most efficient possible, we would plan to work on-site each day from about 7:00am to 6:00pm. We will want to find a convenient way to ensure we could enter the property at beginning of each day around 7:00am and then depart around 6:00pm at the end of the day. In the past, we have worked with property owners to add one of our locks to a gate that we can open and close ourselves when we begin and end each day on site. You know your site better than me, so I'll wait for you to offer suggestions on this detail.

It would be great to meet you on the site the week we do the field work for the investigation but I am willing to make a separate trip to meet you if that is necessary. If the week of May 20th isn't available for you, please offer a few dates that you would be available to meet and I'll check my schedule. I'm certain we can work something out.

I look forward to your reply.

Hi Brooks,

Thank you so much for your time yesterday in talking to us. It was very informative.

This is to confirm that I paramjit Hothi give you access to come to the former Kaiser site to do your testing.

Please let me know possible dates you will be on site, so that I can meet up with you.

Regards,
Paramjit Hothi
